

Tips for Being in Public During Covid-19

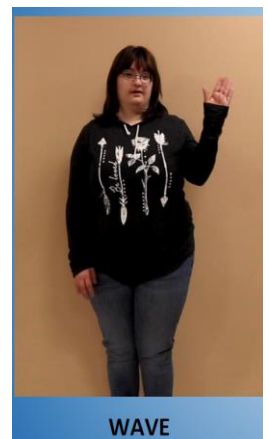

Remember to stay 6 feet away from others.

We should wear a face mask or face covering when we are inside a building that is not our house – like work, school, the grocery store, or the doctor’s office.

Our nose and mouth should be covered by the mask. The mask should fit securely on our face and under our chin.

We should wave to people, bump elbows, or do a long distance high five or fist bump to say “hi” to others.

We should wash hands or sanitize frequently, keep our hands to ourselves and away from our face, eyes, and mouth.
