

# At-Home Treatments for Common Health Conditions of People with Down Syndrome

**Brian Chicoine, MD**

Medical Director, Advocate Medical Group Adult Down Syndrome Center

Faculty, Advocate Lutheran General Hospital Family Medicine Residency

September 13, 2023

Now part of  **ADVOCATEHEALTH**

Advocate  
Medical  
Group

Adult Down  
Syndrome Center  
1610 Luther Lane

# Please note:

- This webinar is intended for families, caregivers, health care professionals, and service providers of individuals with Down syndrome.
- The information in this webinar is provided for educational purposes only and is not intended to serve as a substitute for a medical, psychiatric, mental health, or behavioral evaluation, diagnosis, or treatment plan by a qualified professional.
- We recommend that you bring specific questions about an individual with Down syndrome to their medical and/or therapy providers.

# Objectives

- Describe common health conditions in adolescents and adults with Down syndrome.
- Share at-home treatments for addressing health conditions.
- Discuss when to consult a health care provider about a health condition.

# Resource Library

The screenshot shows the top navigation bar with the Advocate Medical Group logo and 'Adult Down Syndrome Center' text. A search bar contains 'I'm looking for...' and a 'MENU' button with a hamburger icon. Below the navigation is the 'Resource Library | All Resources' heading. Three featured resource cards are displayed: 'People with Down Syndrome' with a photo of a young girl, 'Families & Caregivers' with a photo of a woman and a man, and 'Health Care Professionals' with a photo of a healthcare provider interacting with two patients. At the bottom, five categories are listed with icons and links: 'Events, Classes & Programs' (See the Schedule), 'Video Gallery' (View All), 'Related Organizations' (See Listing of Links), 'Projects' (See Our Latest Projects), and 'News' (View News Articles).

# Ear wax build up (cerumen impaction)

# Ear wax build up

## Signs and symptoms

- Sensation of ear fullness
- Hearing loss
- Ringing in the ears (tinnitus)
- Ear pain
- Dizziness
- Ear drainage or odor

## Considerations in people with DS

- More common
  - Small, curved ear canals
  - Dry skin
- May not report symptoms
- May observe other symptoms
  - Change in behavior
  - Not paying attention
  - Not following directions
  - Losing skills

# Ear wax build up

**Speak to your health care provider before using at-home treatments for earwax if you have a hole (perforation) or tube in your eardrum.**

**It is generally recommended to NOT put any liquid in an ear with a hole or tube.**

# Ear wax build up

## At-home treatments

- Over-the-counter ear drops with carbamide peroxide (e.g., Debrox)
- Baby oil, almond oil, mineral oil, olive oil, or diluted hydrogen peroxide
  - 3-4 drops, 2 times per week
- Cotton swabs on outside part of ear

## Consult a health care provider

- Eardrum has a tube or perforation (hole)
- At-home treatments are unsuccessful

# Toenail fungus (onychomycosis)

# Toenail fungus

## Signs and symptoms

- Yellow to white discoloration of the nail
- Thick and brittle nails
- Splitting of the nails
- Separation of the nail from underlying skin
- Pain

## Considerations in people with DS

- More common
  - Immune system, dry skin, self-care, venous insufficiency, obesity, hallux valgus (bunions), poor-fitting shoes
- May not report symptoms
- May observe other symptoms
  - Change in behavior

# Toenail fungus

## At-home treatments

- Proper foot hygiene
  - Wash and dry feet
  - Trim toenails
- Diet
- Topical treatments, wrap with gauze
  - Vicks VapoRub, tea tree oil, vinegar
  - Ketoconazole, econazole, clotrimazole

## Consult a health care provider

- To confirm diagnosis
- At-home treatments are unsuccessful
- Nail care not possible at home
- Pain

# Constipation

# Constipation

## Signs and symptoms

- Infrequent bowel movements (fewer than 3 per week)
- Hard, lumpy, difficult to pass stools
- Bloating, abdominal discomfort
- Straining, bleeding, and/or pain with pooping
- Feeling of incomplete emptying
- Stool incontinence (accidents)
- Urine incontinence
- Urinary tract infections

## Considerations in people with DS

- More common
- May not report symptoms
- May observe other symptoms
  - Change in behavior
- Insufficient fluid intake

# Constipation

## At-home treatments

- Eat more fiber such as fruits, vegetables, and whole grains
- Drink more fluids
- Increase physical activity
- Fiber supplements
- Stool softeners

## Consult a health care provider

- At-home treatments are unsuccessful
- Pain
- Increasing pain and vomiting – go to the emergency room

# Dry skin

# Dry skin

## Signs and symptoms

- Redness
- Flaking
- Itching
- Cracking
- Often worse in very cold/hot and dry weather conditions

## Considerations in people with DS

- More common
- Generally, not a serious problem but can be quite bothersome

# Dry skin

## At-home treatments

- Liberal use of moisturizing cream or ointment (instead of lotion)
  - 3-4 times per day may be needed
  - Contain alpha hydroxy acids (helps remove loose layers of dry skin)
  - Vaseline, Lubriderm, Eucerin, Udderly Smooth, and many others
- Apply right after shower or bath when skin is moist
- Cotton gloves or socks

**Skin Care**

It is important to wash the skin on my body, too!

If it is hard to reach a part of my body, I can use a long-handled sponge.

Moisturizer helps dry skin and keeps the skin on my hands and body healthy.

I can wear gloves after I put on moisturizer to help with dryness, or protect my hands from feeling greasy or sticky.

I can also drink water to keep my skin healthy.

I can take care of my skin! Taking care of my skin keeps me healthy!

# Dry skin

## At-home treatments

- Mild soaps (e.g., Lever 2000, Dove, Dial with moisturizers, Cerave, etc.)
- Decrease frequency, length, and temperature of showers
- Change socks midday
- Avoid exposure to very cold/hot and dry air
- Humidifier
- Good hydration
- Sunscreen

## Consult a health care provider

- An infection develops
- At-home treatments are unsuccessful

# Chronic cough

# Chronic cough

## Signs and symptoms

- A cough that lasts longer than 8 weeks (4 weeks in a child)
- Many possible causes

## Considerations in people with DS

- More common
  - Craniofacial features
  - Adeno-tonsillar hypertrophy
  - Airway size
  - Low tone
  - Obesity
  - Chronic vasomotor rhinitis

# Chronic cough

## At-home treatments

- oral hydration
- Avoid possible irritants
- Cough suppressant (e.g., throat lozenge, tea and honey, guaifenesin and dextromethorphan)
- Over-the-counter nasal sprays (e.g., fluticasone, mometasone)
- Nasal saline drops or rinses
- Allergy medications (e.g., loratadine, fexofenadine)
- Medication to “thin” the secretions (e.g., guaifenesin)

## Consult a health care provider

- At-home treatments are unsuccessful
- Weight loss without effort
- Coughing up blood or phlegm
- Wheezing or shortness of breath
- Hoarseness that doesn't go away
- A drenching overnight sweat

# Gastroesophageal reflux disease (GERD)

# GERD

## Signs and symptoms

- Pain in the chest or upper stomach
- Chronic cough
- Regurgitation (food traveling back up into the mouth)
- Sore throat
- Sour taste
- Hoarse voice

## Considerations in people with DS

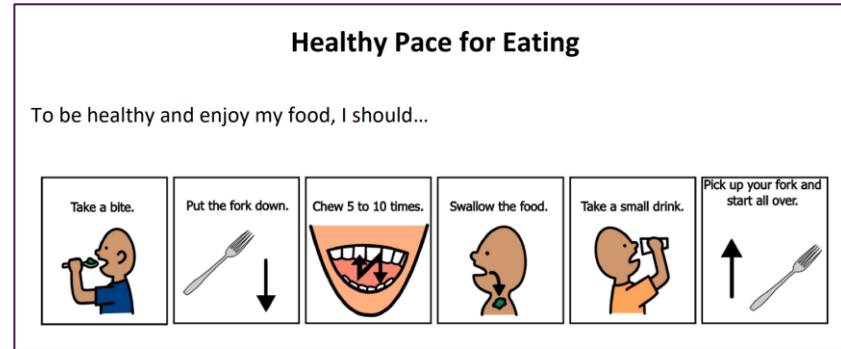

- Sphincter tone
- Obesity
- Sleep apnea
- Dietary habits
- Not reporting milder, chronic symptoms
- Poor sleep

# GERD

## At-home treatments

- Eat smaller meals
- Eat more slowly
- Lose weight
- Do not eat 3-4 hours before laying down or going to sleep
- Elevate the head of the bed with a riser or blocks
- Over-the-counter medications (e.g., Tums, Rolaids, Maalox)
- H-2 blockers, PPI's

- Things to avoid:
  - Fatty, spicy, and citrus foods
  - Caffeinated or carbonated beverages
  - Medications that can make GERD worse (e.g., ibuprofen)
  - Wearing clothing that is tight around the abdomen

# GERD

## **Consult a health care provider**

- At-home treatments are unsuccessful
- Weight loss
- Recurrent vomiting
- Difficulty or pain with swallowing

# Hypothyroidism

# Hypothyroidism

## Signs and symptoms

- Weakness
- Dry skin
- Increased tiredness
- Increased sensitivity to cold temperatures
- Weight gain
- Coarse hair
- Change in cognitive function
- Change in menstruation
- Mood change

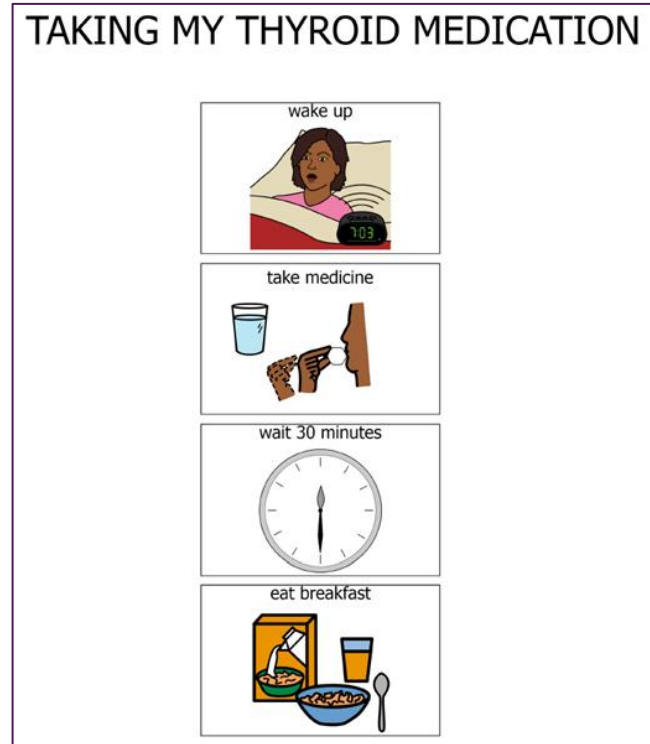

## Considerations in people with DS

- More common
- Many of the symptoms are already present in people with DS
- May not report symptoms
- May observe other symptoms
  - Change in behavior

# Hypothyroidism

## At-home treatments

- Taking medication consistently and correctly
- Consider zinc supplement

# Hypothyroidism

## Consult a health care provider

- Screening recommended every 1-2 years
- Symptoms suggestive of hypothyroidism
- Recurrence of symptoms
- Symptoms of hyperthyroidism (e.g., anxiety, agitation, diarrhea, tremor, fast heartbeat, etc.)

# Pneumonia

# Pneumonia

## Signs and symptoms

- Cough
- Fever
- Shortness of breath
- Weakness
- Chest pain

## Considerations in people with DS

- More common
  - Immunity
  - GERD
  - Sleep apnea
  - Swallowing

# Pneumonia

## At-home treatments

- Cough suppressants for mild symptoms
- Prevention
  - Slowing down when eating
  - Good handwashing
  - Vitamin and mineral supplements?
    - Multivitamin, vitamin C, zinc
  - Dental hygiene and care
  - Treat GERD
  - Treat sleep apnea

# Pneumonia

## Consult a health care provider

- Persistent mild symptoms
- Increasing symptoms
- High fever
- Go to the emergency room if difficulty breathing
- Prevention
  - Immunizations

# Blepharitis

# Blepharitis

## Signs and symptoms

- Inflammation or infection of the eyelids
- Redness of the eyelids
- Sticky secretions on eyelids or eyelashes
- Sometimes associated with conjunctivitis (pink eye/redness of the white part of the eye)

## Considerations in people with DS

- More common
  - Bacterial infection
  - Acne rosacea
  - Seborrhea
  - Autoimmune

# Blepharitis

## At-home treatments

- Keep hands away from eyes
- Warm compresses
- Light scrubbing
  - Half water, half baby shampoo
  - Over-the-counter eye scrubs
- Change pillowcase regularly
- Treat associated conditions
- Ongoing preventative measures

## Consult a health care provider

- Persistent symptoms or irritation
- Conjunctivitis
- Increasing redness or swelling
- Pain
